PROFESSIONAL PROFILE

Software Developer and Agile practitioner with an MSc in Software Development (Merit) and experience building full-stack web applications, REST and GraphQL APIs and database-driven systems across e-commerce, healthcare and real-time platforms. Works across JavaScript, TypeScript, React, Node.js and PHP/Laravel, with a focus on secure authentication, payment integration and maintainable design.

Certified Professional Scrum Master I (PSM I) and ITIL 4 Foundation practitioner. As Scrum Master for a four-person Platform Engineering and DevOps team, helped cut unfinished work at the end of a sprint from about 30 items to one by improving planning and commitment. Brings an engineer's understanding of delivery to team facilitation, and a facilitator's habits of transparency and continuous improvement to engineering work.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, PHP; familiar with Java, C# and Python
- **Front end:** React, Vue.js, HTML5 and CSS3, Tailwind CSS, Bootstrap, jQuery
- **Back end and APIs:** Node.js, Express.js, Laravel, REST, GraphQL, WebSockets, JWT authentication, Stripe and Paystack integrations
- **Databases:** MongoDB, MySQL, PostgreSQL, Microsoft SQL Server
- **DevOps and tooling:** Azure DevOps, CI/CD, GitHub Actions, Docker, Git and GitHub
- **Engineering practice:** Object-oriented design, MVC and design patterns, software architecture, secure development, debugging, testing
- **Agile delivery:** Scrum (Sprint Planning, Sprint Goals, Daily Scrum, Reviews, Retrospectives), Kanban, backlog management, coaching, stakeholder communication, continuous improvement, ITIL 4 service management

PROFESSIONAL EXPERIENCE

Volunteer Backend Engineer – Nurture the Children International | Remote — July 2026 – Present

- Build backend services and REST and GraphQL APIs for a native iOS and Android app.
- Implement authentication, authorisation, input validation and rate limiting across the API layer, and design the database schema behind it.

Volunteer Scrum Master – The Community Revolution | Remote — February 2026 – Present

- Lead Scrum for a four-person Platform Engineering and DevOps team at a London-based technology nonprofit, across 16+ sprints, supporting its move to structured Agile delivery.
- Helped cut unfinished work at the end of a sprint from about 30 items to one by improving planning, Sprint Goals and the team's commitment to them.
- Introduced and refined a Kanban-based board in Plane, giving the team clear visibility of work, ownership and accountability.
- Facilitate Sprint Planning, Daily Scrums, Sprint Reviews and Retrospectives, and coach the team on Scrum principles, backlog management and collaboration.
- Manage impediments and stakeholder communication to keep delivery moving.

Software Engineering Intern – Greentree Capital Group LLC | Remote (US) — June 2024 – August 2024

- Built React interfaces and integrated REST APIs through Microsoft Lists and Power Automate.
- Worked with a cross-functional team on data contracts.

Software Developer – Cobary Inc | Lagos, Nigeria — October 2022 – September 2023

- Built Laravel e-commerce applications and APIs.
- Refactored legacy code, improving development efficiency by 25%.
- Designed MySQL schemas and optimised queries; supported troubleshooting and the implementation of application requirements.

Freelance Full-Stack Developer – Fiverr | Remote — June 2021 – April 2022

- Delivered web applications for small-business clients end to end, from requirements through implementation to deployment, using PHP, MySQL, JavaScript, HTML and CSS.
- Tuned SEO and performance, and provided post-deployment support, including resolving server compatibility and configuration issues.

Co-founder and Backend Developer – Oya Nigeria | Lagos, Nigeria April 2020 – March 2021

- Built the backend for Oya.ng, a classified advertising and e-commerce platform, in PHP (Eloquent ORM) and MySQL, including REST APIs for order management, authentication and payments.
- Delivered shopping cart, checkout, product management and administrative product validation features, and optimised database performance.
- Wrote front-end behaviour in jQuery and vanilla JavaScript, collaborating with the web designer.

Earlier experience: Software Developer, Hustle in Lagos (August – November 2019); Software Development Intern, HiiT PLC (May – October 2017).

SELECTED PROJECTS

BidWars 2.0 – real-time auction platform *React, TypeScript, Node.js, Express.js, MongoDB, WebSockets, JWT*

- Full-stack platform for live online bidding, with real-time bid updates and notifications over WebSockets and JWT-secured access to protected features.

B2B e-commerce platform – MSc project and dissertation *React, TypeScript, Node.js, MongoDB, Stripe, Azure DevOps*

- Built full stack by a five-person cross-functional team, serving as Scrum Master and developer, with Stripe payments and CI/CD pipelines in Azure DevOps.
- The dissertation, The Impact of Design Patterns on Software Quality, applied MVC and GRASP to the platform to measure maintainability.

Hospital Management System *C#, ASP.NET MVC, Microsoft SQL Server*

- Built during a professional software development training programme and completed with distinction.

Ethereum price prediction *Python, Pandas, NumPy*

- Applied regression analysis to historical price data for the Data Intensive Systems module and reported the findings.

Other projects: Hospital Appointment Management System and Insurance Management System (Laravel, MySQL, JavaScript; MSc coursework); QuizQuest (Java, JavaFX, MySQL); StudentGrader (PHP, PDF generation; freelance client); Travel Package Bids (PHP, MySQL; supported for three weeks after deployment); Hospital Appointment desktop application (C#, WPF, SQL Compact).

EDUCATION

MSc Software Development (Merit) – Coventry University, UK 2023 – 2024

Modules included Data Intensive Systems, Secure Design, Mobile Platforms and Software Architecture.

BSc Systems Engineering – University of Lagos, Nigeria 2014 – 2019

CERTIFICATIONS AND COURSES

- Professional Scrum Master I (PSM I) – Scrum.org
- ITIL 4 Foundation – 2026 (93%)
- Oracle Certified Java Professional, Java SE 7 – Distinction
- Programming in Microsoft C#; Web Applications Development (ASP.NET MVC Platform) – HiiT PLC, 2017
- **Courses:** React Basics (Meta); Learn TypeScript (Scrimba); Node.js Development; PHP Object-Oriented Programming; Introduction to MongoDB; Laravel 8 Development; Git from Scratch

ADDITIONAL EXPERIENCE

Support Worker – We Care More Ltd October 2023 – Present

- Provide person-centred support to individuals with learning disabilities and varying support needs, adapting communication to each person, including those with limited verbal communication.
- Follow care plans, safeguarding procedures and confidentiality requirements, and train new colleagues.

Warehouse Operative October 2024 – October 2025

- Sorted and processed goods accurately to deadlines in a fast-paced, target-driven team.
